

SilvAssist 3.0.1.2 Install and Registration Procedures

Please note that SilvAssist 3.0 will only install on PC's with Windows 7 that have ArcGIS 10.0 - 10.2.2 already installed. If you have different versions, please contact us at **support@lmssmail.com** for your options.

1. Download the SilvAssist 3.0.1.2 installer from our website link.
2. Unzip the file and run the file named **Setup.exe** inside the unzipped folder.
3. Open ArcMap and add the SilvAssist toolbar to your map. Click on any of the SilvAssist tools and when prompted to register, use your mouse to select and copy/paste the SilvAssist Machine ID into an email to support@lmssmail.com. Include your contact info and details about the install (new purchase, license transfer from old PC, etc.).
4. When you receive the codes back, choose the register manually option in SilvAssist and copy/paste the SerialID and Activation Key into their respective fields.
5. You will need to have TCruise Desktop and the LandMark Export Module installed and registered on your PC to be able to create the database needed to load data into SilvAssist. See the Software Downloads section of the LandMark Spatial Solutions website for install links and instructions for install and registration of these programs.
6. Call us at 866-395-5440 x2 or email support@lmssmail.com if you have problems or questions.
