

HEC

Haglöf Electronic Clinometer for Accurate Results

Field Pro's have made their choice: the HEC instrument is the best clinometer on the market! Measure from any distance and have the height results presented to you in the display.

HEC – Everything you've asked for in a Clinometer!

- Accurate results
- Small and powerful
- Heights measuring from any input distance
- Display featuring results – eliminates calculation errors
- Easy-to-use with online quick user's guide
- Extremely low battery consumption
- Low weight, reliable, rugged

The HEC Clinometer features measuring results of inclination and heights in the instrument display, eliminating any risk of calculation errors.

Designed for field use, the HEC instrument fulfills all demands for a functional and rugged clinometer.

This revolutionary technique allows you to measure the heights and inclination in the field that you need, using an instrument so small, that you will never notice carrying it.

Easy use and electronically precise, this clinometer will be your accurate assistant for many years to come.

Independent tests show that divergences from the correct height were much smaller when using the HEC instrument compared to more expensive, analogous clinometers.

”I have been looking for a clinometer such as yours for twenty years, and I can tell you it's been worth the wait!

Technical Specification

HAGLÖF ELECTRONIC CLINOMETER

Size:	20 x 63 x 44 mm / 0,8 x 2,5 x 1,7 inch
Weight:	50 g/1,8 oz (incl. battery)
Battery:	1 x 1,5 AA alkaline
Temperature:	Min -15° Max 45° C / Min 5 Max 113 F

MEASUREMENT SPECIFICATIONS

Height:	Min 0 Max 999 m/ft Resolution: 0,1 m/ft < 100m/ft or 1m/ft > 100m/ft
Angles:	-55° to 85° deg Resolution: 0,1° deg Accuracy: +0,2deg
