

# LTI'S LOG DECK VOLUME SOLUTION

It goes without saying that log decks have a huge dollar value, and knowing exactly how much you are taking in and moving out is critical.

Working with a mountain of inventory that is ever changing and often stacked with extremely narrow spaces in between can be very difficult. Since conventional measurement tools and methods are unable to combat these real-world problems efficiently, LTI has developed a much-needed solution.

**TAKES JUST ONE PERSON TO OPERATE**

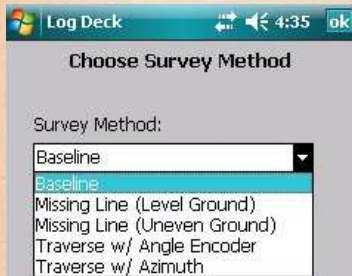

**TRACK "JUST IN TIME" INVENTORY AS IT COMES IN AND OUT**

**INSTANTLY GENERATE DECK LENGTH & AREA**

**CALCULATE MBF FOR SPECIFIED LOG SPECIES & DIAMETERS**

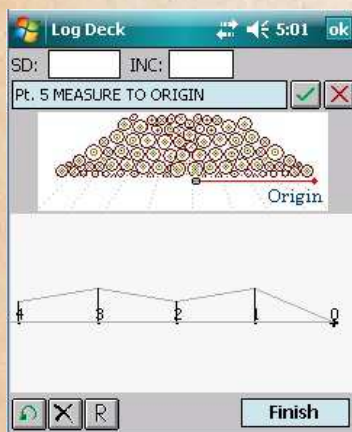

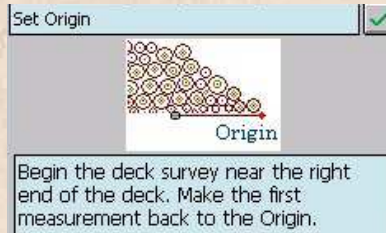

**GET ACCURATE & REPEATABLE RESULTS**

## LOG DECK SOFTWARE SOLUTION

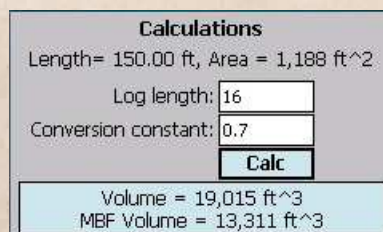

You can choose between five different survey methods to find the one that best suits the environment for each individual deck.

Simply follow the step-by-step instructions and use the helpful illustrations to guide you throughout the process.

Enter the log length and conversion constant, and instantly get the calculations you need right in the field.

**GET ACCURATE & REPEATABLE RESULTS**

**Log Deck system requirements:**

**O/S: WM 6.0, 6.1, 6.5**

**QVGA display only: Portrait/Landscape**

**Integrates with LTI's Impulse/MapStar® System and TruPulse® lasers**

**Compatible with Allegro, Archer, BAP and other data collectors**
