

Digital Diameter Systems

For the modern forester who prefers to work with smartphones and tablets, the MD II caliper is the obvious choice. The MD II caliper is practical and quick to learn, yet offers safe data storage and versatility.

The MD II

MD II Digital Caliper: Art no. 13-430-3001 -- 13-430-3025 The MD II caliper is available in six scale lengths and with different graduation options and features.

The MD II is used to collect diameter data with species and heights. Data can be stored in the internal memory and transferred with USB cable or Bluetooth to handheld computer device or office PC for additional storing and processing. Data can also be transferred to the custom app and stored in your smartphone or tablet device. Heights are input from Vertex and Vertex Laser instrument with IR.

The MD II caliper is a perfect choice for easy and efficient data collection in the forest, allowing for simple methodology and quick and reliable results.

The icon-based menu makes the MD II even more intuitive and easy to use. The MD II Com PC communication software is included on delivery with MD II Caliper packets from January 2017. MD II Com PC can also be purchased as separate licenses, art. no 14-101-1007. SmartPhone app can be downloaded free of charge from Google Play (Android).
