

What's New from LMSS?

1. NEW TimberHaul The Simple Supply Chain Solution

- Simple 1 hour Setup
- **Manage Tracts and Contracts**
- Dispatch and Message Drivers
- Verify/Edit Load Info
- Track Trucks
- Simple Ticket Scan with AI Verification
- **Manage Loads and Quota**
- Reconcile Tickets and Run Reports
- **Cost-effective, Predictable, Crew-based Pricing**

Tract	Mill	Contract Total	Allocated	Quota Depletion
Baldwin County Tract	West Fraser - McDavid McDavid	50	25	0 0%
LFA Tract	Rogers Lumber Co. Orange	101	25	0 0%
LFA Tract	International Paper Co. Orange	67	25	0 0%
Baldwin County Tract	International Paper - Cantonment Cantonment	50	20	0 0%

2. NEW TCruise X Desktop for Cruise Compilation and Reporting

- 64 Bit version – 30+ times faster processing
- Simpler, faster, workflows
- Enhanced Excel Reports with graphs and charts
- Pro Version - Growth & Yield, Carbon, and Single-tree Lidar compilations
- Lite Version—Excel Reports + integration with InventoryManager

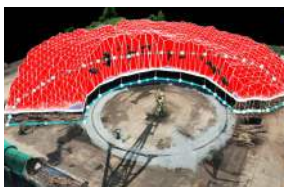

3. NEW TCruise Cloud for Online Processing and Reporting

- Cloud-based Compilation with no TCruise Desktop installation necessary
- Enhanced Excel Reports with graphs and charts
- Simple API integration from InventoryManager

4. Drone Update: (DJI is still the best option!)

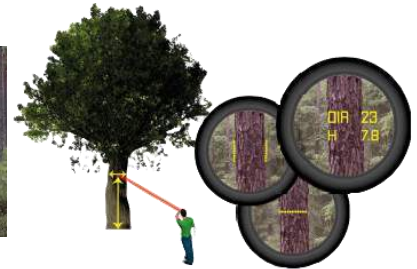

- **DJI Matrice 4 Enterprise**—The Matrice 4 Enterprise Series redefines industry standards for small commercial drones. With a 0.5 sec mechanical shutter and a 49 minute flight time, you can fly map 200+acres on a single battery. With a laser ranger finder, an integrated RTK module for centimeter-level precision, and a 7" high-vis screen on the controller, the Matrice 4E brings mapping and mission efficiency to new heights. Enhanced obstacle avoidance ensures safe flights in dynamic environments, and the built-in AI model can automatically detect and count various objects from the sky. A thermal version is available for fire-fighting, search and rescue, inspection, and night operations.
- **SkyLab**—Drone Orthophoto processing (\$500 to \$2400/yr), Tree and Seedling Counting (\$1.50/ac with min of \$1000), Change Detection from satellite data post-disaster, weed and disease classification.
- **Pix4D Cloud**—Optimal for calculating 3D volumes of stockpiles and log decks.

5. Haglof VL Geo 2—now with Remote Diameter and BAF Function

- DME & Reverse Prism for borderline trees.
- Rangefinder, Hypsometer, GPS, Compass.
- Shoot remote DBH — up to 0.5" accuracy!
- Find upper stem diameter, then height!
- Set BAF, shoot tree and determine in/out from plot center.
